PROJECTS

Stroke Risk Prediction Web Application

Technologies:HTML,CSS,JavaScript,Node.js,Express.js,

Python,Machine Learning

- Developed a full-stack web application to predict stroke risk using health and lifestyle data such as age, blood pressure, heart disease, glucose level, BMI, and smoking status.
- Built a responsive frontend using HTML, CSS, and JavaScript with a Node.js and Express.js backend for efficient data processing.
- Integrated a Python-based Random Forest machine learning model to generate personalized stroke risk predictions.
- Applied data preprocessing techniques, including missing value imputation, normalization, and categorical encoding, to improve prediction accuracy.

Quiz-platform

A feature-rich, responsive web-based Quiz Platform built with *React, **Redux, **React Router, and **Material-UI (MUI)*. This application allows users to create, manage, and play interactive quizzes with dynamic validations and persistent local storage**.**

LotteryGame

A simple and interactive Lottery Game built using HTML, CSS, and JavaScript.

The project allows users to generate lottery numbers and view the game result through an easy-to-use interface.

EDUCATION

B.Tech – Computrt Science & Engineering

Aurora Scientific and Technological Institute

CGPA 6.5/10.0

LANGUAGES

- English
- Telugu

DECLARATION

I, with this, declare that the details mentioned above are the truth and facts as per my knowledge, I hold the responsibility for the correctness of the particulars mentioned above.
